MARTIN et al Serial No. 09/363,013 May 24, 2004

## AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph on page 7, lines 11-17 to read as follows:

Equation I illustrates a typical premixed monopropellant oxidizer fuel mixture reaction in accordance with the present invention:

$$CH_3CH_2OH + 6H_2O_2 + 3H_2O \rightarrow 2CO_2 + 9H_2O$$

This formulation achieves the objectives of the present invention with 80%  $H_2O_2$ , 12%  $CH_3CH_2OH$  and 8%  $H_2O$ . The  $H_2O_2$  is preferably at a 70% concentration in water. The low concentration of  $H_2O_2$  (70%) allows the use of commercially available, easily handled material.
